

REPORTING REQUEST

Since *Apply2College* is part of a national campaign, we ask each participating school to report information about their event so EducationQuest can submit statewide information to the American College Application Campaign (ACAC).

How to track student application data:

We streamlined the reporting process and created a simple Apply2College Tracking Sheet. Here's how the process works:

1. Print several copies of the Tracking Sheet.
2. Have students check out of the event to track the number of applications they completed, and to which colleges.
3. Send all the Tracking Sheets to EducationQuest and we will tally the aggregate totals.
