

Since *Apply2College* is part of a national campaign, we ask each participating school to report aggregate information about their event so EducationQuest can submit statewide information to the American College Application Campaign (ACAC).

Evaluation survey

Following completion of the campaign, EducationQuest will send you a survey via SurveyMonkey to learn details about your event and your overall impression of the campaign.

Specifically, we want to know:

- Total number of seniors who participated
- Total number of college applications completed
- A list of colleges that received applications, and the number of applications submitted to each school
- Your observations about the event, and how to improve next year

How to track student application information

Use this [tracking sheet](#) (or create your own) to:

- *Check students in* to track the number who participate.
- *Check students out* to track the number of applications they completed, and to which colleges.

Report aggregate student information to EducationQuest via the survey.

If you have questions, contact:
